

LIQUID INFUSIONS

FOR AGRO-FOOD

& HEALTH INDUSTRIES

The process of infusion is an ancient food and medicinal practice consisting in placing a solid in hot water in order to extract its nutritional benefits (from leaves, flowers, fruits, grains...)

herbalT

As a specialist of extraction, Syneum offers a range of liquid infusions as ingredients for the agro-food industry and for health, listing many advantages

A wide range of packaging options in aseptic pouches

Carton
20 L.

Drum
200 L.

Arcabox
1000 L.

- ✧ **Natural flavoring ingredients**, promising a complex and authentic taste from the infused raw material
- ✧ **Premium labelling** : « infusions of... » referring to a familiar food practice
- ✧ **Ingredients carrying a health value** : by extracting all of the active and useful principles of the plant, called the totum
 - Soft claim** : through health-associated plants
 - Hard claim** : through EFSA-validated claims, (requires a tailored approach)
- ✧ **Easy to use ingredients** : conservation at ambient temperature usually for 12 months
- ✧ **Management of the full supply chain**
- ✧ **R&D team at your disposal for tailor-made solutions**
- ✧ **Subcontracting of your raw materials on request**
- ✧ **Made in France**, at the heart of the Auvergne region

OUR CERTIFICATIONS

herbalT

Syneum, more than 30 years of
experience in plant extraction

CODE	PRODUCT	LATIN NAME OF THE PLANT	CONTAINS	APPROXIMATE DOSAGE	ORGANIC 	ADVISED STORAGE	DMD (MONTHS)	MOQ (KILOS)
